

Veezoo is an ETH Spin-off providing a conversational AI solution to analyze and visualize data to help people make data-driven decisions.

We are currently looking to recruit a

Software Developer Backend (100%)

Key Responsibilities

- Develop solutions for real world, large-scale problems with renowned customers
- Designing, programming, documenting, testing and refactoring code
- Collaborating with frontend developers, backend developers and other team members

Requirements

- Programming experience in general and with Scala (or Java) in particular
- Solid foundation in computer science, with strong competencies in data structures, algorithms, and software design
- Work experience in Software Engineering
- Interest in working in a very agile and flexible environment
- Proficient in English and German in writing and speaking
- Solution-oriented and independent worker
- Valid work permit for Switzerland

We offer an opportunity to explore and to train with cutting-edge technologies in the AI/NLP space, to shape an innovative business and to bring real value to people. We offer participation in the form of stock options. With a high degree of freedom, a flat hierarchy and an attractive work location at the Technopark in Zurich, you will be able to combine very interesting work with dedicated purpose and joy.

We look forward to hearing from you!
